

The Uinta County School District #6 Transportation Department has a student monitoring system on the buses called ZPass. ZPass is a program that will assist us in the event of a lost or missing student on a route, and accounting for students on trips in case of an accident or emergency. This is how it works:

Each student will be given a card that will be scanned each time they enter and exit the bus. If a student does not make it to their destination on time, we will be able to quickly find out if the student is still on a bus, or where and when that student got off. If on a trip and there is an emergency or accident we will know if that student is on the bus or not. There is no personal information on the card, and it cannot allow us to track where your child is. It simply allows us to know what time and where they got on or off the bus.

Thank you for your participation. The safety and security of our students is very important to our District. While this system will greatly assist us in our ability to know whether or not a child is on a bus, we know there will be questions. For more information on ZPass please refer to the Transportation area on our District Web site. It can be found at "uinta6.k12.wy.us" For any concerns or questions, please feel free to contact Bruce Bluemel at the numbers listed above.

Parents will be given the option to participate in this program. If you do not want your child to participate, please write their names and sign the request below. Then please return it to the building secretary, so that it can be forwarded to the transportation department. This will need to be done yearly if you want to opt out. **Please understand that opting out may limit the District's ability to know if your student is on a bus, and may slow down or inhibit our ability to contact you in case of an emergency.**
